

SAVE space, HEAT, ENERGY WITH rapid heat

In the UK alone

165 MILLION
cups of tea

70 MILLION
cups of coffee
everyday

Instant hot water
within

2 SECONDS
of switch on.

Instantaneous electric
water heater market in
Europe alone is

1.15 MILLION
units per year

IP65 RATING
can be used in harsh
environments

Any desired temperature

90-95 degrees
celcius for tea
and coffee
35-40 degrees
celcius for
washing

Previously used by
CRESSALL
for its EV2
water-cooled resistor for electric
vehicles.

The average UK
household wastes

24 LITRES
of water per day, waiting
for the shower to become
hot enough.
